\$1000 Worth of Candle Light

WHEN George Washington was President, a great ball was given in his honor by the citizens of Philadelphia.

The fairest ladies—the bravest men—gathered to pay homage to their first president, the great leader who had become "First in the hearts of his countrymen." The ball was one of the most elaborate social events ever staged in America. Ten thousand candles—the greatest illumination New America had ever seen, lighted the ball room.

These candles, at present day reckoning, would cost more than \$1000. One thousand dollars for candle light! How strange this seems today, when the same amount of brilliant electric light in a modern hotel ball room can be had for less than 25 cents an hour-and how much more conveniently!***Electric light is the cheapest and best light humanity has ever had -many times cheaper than candle light -infinitely cheaper than light from oil—and incomparably better than either.

Electric light is cheaper now than ever before. Use it freely—for good light makes cheerful homes and is the smallest item in the family budget.

St. Louis has low electric rates—rates lower now than before the war - rates which have decreased constantly, while the cost of other living necessities and comforts has risen 65 per cent.

Above the smoke the sun still shines

Sunshine is priceless. Light, health and happiness go hand in hand. The smoke nuisance is a perpetual robber. Day after day, fouling the air and dimming the sunshine, it takes heavy toll from St. Louis.

The cost of soft coal is comparatively low. The cost of burning soft coal is appallingly high. Because of soft coal smoke and soot, St. Louis pays millions yearly in abnormally large bills for cleaning, painting, papering and laundering.

Each year smoke-polluted air causes millions of dollars of deterioration in property. Smoking chimneys are signals of danger, discomfort, dirt, waste and loss. Breathing soot-filled air is not conducive to health and long life.

Burn Gas, the Clean Fuel

Help make St. Louis a smokeless city -by burning GAS, the ideal fuel for home-heating and industrial uses. No soot, smoke, ashes or cinders. Its control is as easy and accurate as setting the hands of your watch. Always ready. You pay only for what you use -after you use it.

Call and let us show you letters from St. Louis people who have used gas heat for years and who tell of its superiority and economy. Our engineers will gladly supply you with fullest information regarding gas heat for home and industrial uses.
